

JUNGTEC – JG

Type	Cross-section	Remark
JG-1		Encased flat profile gasket, model: without centring ring, graphite or PTFE layer
JG-2		Encased flat profile gasket, model: with centring ring, predetermined breaking nut, graphite or PTFE layer
JG-3		Encased flat profile gasket, model: with spot-welded centring ring, graphite or PTFE layer
JG-VARIO		Encased flat profile gasket, model: with JUNGTEC Vario Centering system, graphite or PTFE layer

Material and other models on request

JUNGTEC - JP

Type	Cross-section	Remark
JP-1		Encased flat profile gasket, model: without centring ring, graphite or PTFE layer
JP-2		Encased flat profile gasket, model: with centring ring, predetermined breaking nut, graphite or PTFE layer
JP-3		Encased flat profile gasket, model: with spot-welded centring ring, graphite or PTFE layer
JP-VARIO		Encased flat profile gasket, model: with JUNGTEC Vario Centering system , graphite or PTFE layer

Material and other models on request

JUNGTEC – KJ cam profile gaskets (fine profile)

Type	Cross-section	Remark
KJ-1		Cam profile gasket without centring ring, with graphite or PTFE layer
KJ-2		Cam profile gasket with centring ring, predetermined breaking nut and graphite or PTFE layer
KJ-3		Cam profile gasket with spot-welded centring ring and graphite or PTFE layer
KJ-mit VARIO		Cam profile gasket with JUNGTEC Vario Centering system , graphite or PTFE layer

Material and other models on request

JUNGTEC ECO (flat profile gaskets with layers)

Type	Cross-section	Remark
ECO plus		Flat gasket with centring ring and narrow graphite-or PTFE layer to the higher surface pressing. Fulfilled VDI 2440 (TA-Air gasket), inner spring tooth sealing to the medium.
ECO puh		Flat gasket with centring ring, graphite layer and PTFE-U-Cover
ECO TOP		Flat gasket with centring ring and narrow graphite- or PTFE layer with higher surface pressing and additional external gasket . Inner spring tooth sealing to the medium.

Material and other models on request

JUNGTEC REVOLUTION

Type	Cross-section	Remark
REVO-LUTION		The REVOLUTION is an embossed seal cam profile gaskets from a flexible stainless steel makers an both encapsulated graphite.

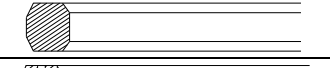

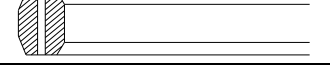

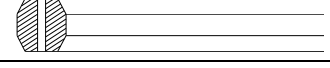

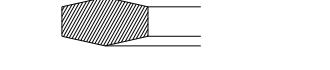

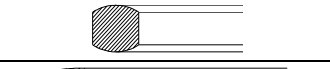

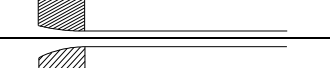

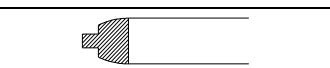

JUNGTEC VISIO

Type	Cross-section	Remark
VISIO		The VISIO consists of a massive stainless steel girder with embossed inner and outer tooth and sided graphite edition.

JUNGTEC - Universal Flange Spreader

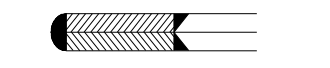

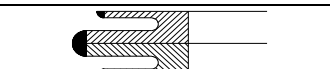

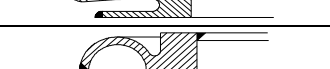

J – SP 3		Universal spreader for flange joints
J – SP 4		Universal spreader for flange joints (extended model)

Metallic gasket

Type	Cross-section	Remark
RJ-O		Ring joint gasket, oval model
RJ-K		Ring joint gasket, octagonal model
RJ-RX		Ring joint gasket, type RX
RJ-BX		Ring joint gasket, type BX
SKJ		Spike-edge gasket
BDJ		Crowning gasket
LJ		Lenticular gasket
LJ-H		Lenticular gasket, split model
LJ-B		Lenticular gasket, unpolished model
LJ-Z		Lenticular gasket, with centring edge
RD-HJ		O-ring gasket
E-J		Spacer

Material and other models on request

Circular welding gaskets

Type	Cross-section	Remark
SJ-10		Membrane welding ring gasket
SJ-11		Membrane welding ring gasket with external welding seam
SJ-12		Membrane welding ring gasket with hollow lip to retain different radial expansion
SJ-13		Membrane welding ring gasket with hollow lip to retain high and different radial expansion, e.g. heat-exchangers
SJ-14		Membrane welding ring gasket with external welding seam and elastic spiral gasket
SJ-15		Membrane welding ring gasket with hollow lip to retain different radial expansion and elastic spiral gasket
SJ-16		Membrane welding ring gasket with hollow lip to retain high and different radial expansion and elastic spiral gasket. e.g. heat-exchangers
